

# Improving Team Productivity Through Workforce Analytics

Boosting productivity across an entire organisation is never easy, and it is harder now that teams are split up, some working in the office and others working from home. Management is struggling to adapt and get meaningful data on team performance and the effectiveness of systems they use on a day-to-day basis.

Onestop understand as we had to make the same transition. We firmly believe that no team member comes to work wanting to do a bad job. It is our responsibility as management to make sure that the tools we provide our team are suitable and enable them to complete their work in an efficient manner and help them feel they are making a valuable contribution to the rest of the team. So how can you find out what tools are valuable to productivity, and what can you do to help make work easier for the team? The answer to this is to understand how your team work.

## Benefits of Phoenix Team Analytics

### Gain deeper insights on productivity & focus

Compare and analyse team productivity reports to identify top performers, frequently used applications, and so on.

### Identify patterns and analyse trends

Use analytics to see what productivity looks like for each team member and who is at risk of over working.

### Eliminate workplace distractions

Phoenix Team Analytics productivity reports allow you to understand what activities contribute towards getting important things done and what activities are complete distractions from work.

### Meet deadlines

Uncover key productivity metrics to help you understand how your team work so you can improve productivity and meet work deadlines.

### Develop personalised reports

Create your own productivity reports that meet your specific needs so you can analyse user activity data key to your organisation.

### Share analysis insights with your team

Analyse Phoenix Team Analytics reports with your team and management so everyone understands how productivity can be improved.

Mental health is a massive issue, and we have to keep an eye on the risk of our team suffering "burn out". We learnt that technology was a key asset in helping us keep our team aligned, healthy, and keen to grab the benefits of a hybrid working model.

## When would you use Phoenix Team Analytics?

- Workforce productivity
- Remote workforce management
- Operational efficiency
- User activity & employee training
- Workforce analytics
- Data privacy & compliance

## Key insights uncovered:

- Are my teams aligned and making progress goals?
- What are my employees' level of engagement?
- Which apps and sites consume most of their time?
- What are their distractions?
- What bottlenecks are in their way?
- Who are my top performers?
- Who might be on the verge of burnout?
- Where are potential compliance risks?

# Key features

## Dashboard

Get the bite-sized business intelligence of workforce activity analytics such as top users, top applications, and website usage patterns.

## Activity reports view

View a variety of analytical reports to drill down into valuable team productivity insights for comparative analytics.

## Real-time activity review

Understand employee workflows, uncover compliance risks and more. Create custom schedules for reviewing user activities for teams in different locations and time zones worldwide.

## Team productivity pulse

Immediately see team productivity metrics and availability status via an at a glance dashboard throughout the day.

## Screenshot captures

See the visual evidence of past and present activity history. Protect sensitive data and flag accessed sites that pose compliance risks.

## Activity logs

Reference detailed logs of user activities collected to better understand what transpired, when, and by whom for audit trails.

## Activity classification

Leverage Phoenix Team Analytics' intelligent engine that automatically builds a library of apps and sites employees use and classifies productivity categories with AI-given algorithms.
